## LAKE ONTARIO AMERICAN FLEET

### RESOLUTION

First and Second boats in the following series: Spring, Doyle Trophy, World's Championship, and 12th District Elimination, and August, will be eligible to sail in the Club Championship Series, which shall consist of four races, the first three of which will be elimination races. The two boats receiving the greatest number of points in the first three races shall sail a two-boat race on Monday, September 4, 1939 to determine the Club Champion.

Any races unsailed because of weather conditions shall be dropped from the schedule except in the Club Championship Series.

For the purpose of computing the percentage points in each series, except the Crew Series, each boat competing in any of the races shall receive one point for finishing and one point for each boat that it beats which has started in that race. Percentage points shall be the total of points so secured, divided by total possible points that a yacht may gain in all races in each series.

For the purpose of computing the percentage points in the Crew Series, each boat competing in any of the races shall receive one point for finishing and one point for each boat that it beats which has started in the race. Percentage points shall then be total of points so figured, divided by total possible points that a yacht may gain in all races in which it has competed.

No substitution of a Skipper shall be allowed except by unanimous consent of all competing Skippers in that race, and only one substitution of a crew in any one series, except by unanimous consent of all competing Skippers in that race, shall be allowed.

A crew shall have sailed in all of the races in any series to be eligible in the Crew Series.
